

Don't Burn Fat.
Don't Torch Fat.

BOMB FAT!

Meat the newest, strongest, hypermetabolic, calorie-burning supplement on the market: BLACK BOMBS! When six-time Mr. Olympia Dorian Yates competed, everyone agreed that he was as hard and as dry as granite. So, if you think the most freaky-ripped Mr "O" of all time left anything on the table when formulating BLACK BOMBS, you should get your head examined! This is quite simply the perfect "competition strength" fat burner, designed for guys who put everything on the line to remove every last

drop of muscle-blurring fat from their physiques without losing an ounce of hard-earned muscle! This combination of a precise ratio of scientifically studied stimulant extracts and alkaloids is formulated not only to be the hardest-core fat burner on the market but to also jack up energy and performance levels through the roof!

WHAT DOES BLACK BOMBS DO?

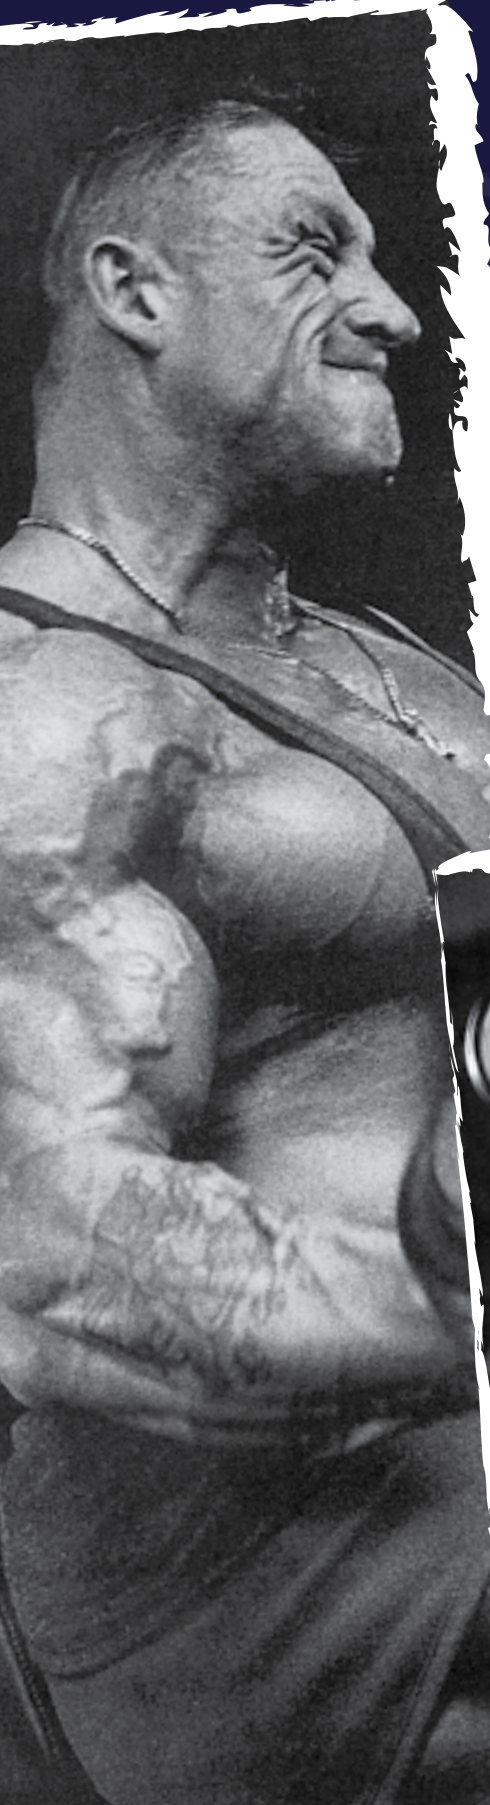

BLACK BOMBS amplifies your metabolic rate to maximize fat burning. It also decreases appetite and cravings. That makes you an around-the-clock fat-burning machine and much less likely to cheat on your all-important diet. So BLACK BOMBS covers all the fat-loss bases, increasing the fat that your body oxidizes and decreasing your intake of the sugars and starches that turn off the body's fatburning switches and put it in "storage mode."

WHO SHOULD USE IT?

BLACK BOMBS is specifically formulated for bodybuilders and hardcore exercisers who need the strongest possible fat-loss and appetite-suppressing support. This is not a product for "part-timers" or guys trying fat burners for the first time.

This is for guys who've been in the trenches, guys who can eat conventional, mainstream fat burners like candy! BLACK BOMBS has been personally tested by one of the most discriminating bodybuilders of all time—Dorian Yates—along with several other professional physique athletes the world over ... and it's only been released to the public in its final form now, after the pros gave it a unanimous thumbs-up! So please, if you are sensitive to stimulants or haven't used fat burners before, we urge you not to take this product!
